

## What are the features?

The Hydration Station features include:

- Two stainless steel troughs on both sides of the trailer
- Eight drinking taps
- Eight tap outlets for filling drinking bottles
- Mobility to position the station in the best possible location
- The ability to be connected to mains water supply or into a storage tank supply and
- Self-contained lighting for use at night.

The trailer is roughly 3.7 metres long, 3.9 metres high and 2.5 metres wide.
