Boneo Water Recycling Plant

Key points of this month’s bulletin

- A reminder that we will be working continuously from 4am Wednesday 6 May to 9am Saturday 9 May.
- Additionally, work will also take place Saturday 9 May (6am to 6pm) and Sunday 10 May (7am to 6pm) to complete activities that cannot take place during the week.
- Every Wednesday and Friday we will start work early (approximately 6am) and may require to work late into the evening (approximately 8pm) to complete the concrete pours of that day.
- We are monitoring and receiving daily advice regarding Covid-19. Activities on site are continuing as planned and we will notify you if circumstances change.

Project update

In April the team has busy undertaking the following activities:

- Expanded our construction site compound including additional sheds to accommodate Covid-19 physical distancing requirements.
- Construction works on the clarifier, primary settlement tanks, inlet works and anoxic tank.
- Installation of the mechanical pumps and pipework in the tertiary treatment plant.

Upcoming works

In May the project team plans to undertake the following works:

- Installation of underground pipework throughout the Plant.
- Connections between new and existing infrastructure.
- Epoxy coating of water retaining structures

During construction of the above structures we will need to continue to undertake large concrete pours.
After hours works

In the next week there are several occasions that we will be working outside normal work hours including the following:

- Continuous works from 4am Wednesday 6 May to 9am Saturday 9 May to install new pipework and complete a tank connection.
- Work will take place on Saturday 9 May (6am to 6pm) and Sunday 10 May (7am to 6pm) to complete pipework installation activities.

Further information on these instances is below.

Reminder: Continuous works
From 4am Wednesday 6 May to 9am Saturday 9 May

To facilitate the installation of new pipework along the western side of the plant (see map to the left) and works to an existing tank in the same area, a major construction activity at the plant is required.

This requires work being undertaken continuously (day and night) until the pipeline and tank upgrade is complete.

We’d like to let you know that, weather permitting, we’ll be starting continuous (24/7) works at 4am on Wednesday 6 May and anticipate to have these works completed by 9am on Saturday 9 May.

NEW: Saturday 9 May & Sunday 10 May

Up to 10 people will work to complete pipework installation in the middle of the Plant. These works will block access to operational areas of the Plant and cannot take place during the week.

Machines including excavators will work in the area. Work hours will be:

- Saturday 9 May 6am to 6pm
- Sunday 10 May 7am to 6pm.
Need to get in touch?

We’re here to help, so here’s how to reach our project team:
