

## Accredited Contractors List

### To undertake construction work for the land development industry

Updated 24<sup>th</sup> January 2023

#### Disclaimer

The firms and individuals on this list have represented to South East Water that they have the management capability, qualifications, expertise, and experience as well as technical capability to carry out the categories of work listed below. South East Water makes no guarantees or warranties as to the performance, commercial practices or financial status of these firms. South East Water does not endorse any of the products or services offered by the firms or individuals listed. It is strongly recommended that you undertake normal diligence procedures to select appropriate accredited contractor.

Sewer and water supply construction works and services categories:					
Sewer		Water		Risk	
<b>SC1</b>	Reticulation ≤ DN 280 and ≤ 3.5m in depth	<b>WC1</b>	Reticulation water mains ≤ DN 280	<b>R1</b>	Risk Overlay – Ground conditions
<b>SC1(a)</b>	Reticulation Sewer ≤ DN 280 and > 3.5m and ≤ 5m in depth	<b>WC2</b>	Distribution water mains > DN 280	<b>R2</b>	Risk Overlay – High density
<b>SC2</b>	Branch/main sewers > DN 280 or reticulation > 5m in depth	<b>WC3</b>	Water supply pumping station & pressure control system	<b>R3</b>	Risk Overlay – Major crossing
<b>SC3</b>	Reticulation pressure pipelines in sewerage systems < DN300 (not rising main)	<b>WC6</b>	Steel pipelines		
<b>SC4</b>	Sewerage pumping station (prefabricated) & sewer rising main	<b>WC8</b>	Storage structure construction		
<b>SC5</b>	Sewerage pumping station (cast-in-situ) & sewer rising main				
<b>SC7</b>	Any works undertaken on live sewer assets				

## Accreditation tiers

(Refer to Land Development Accreditation Deed **Schedule 6 – Performance Regime** for details)

**Self-Certified:** Top performing (based on Performance Reports), evidence of continuous improvement, self-reporting, satisfactory Office Audit Report, **accreditation reviewed after 2 years.**

**Certified:** Commitment to continuous improvement, evidence of non-conformance rectification, satisfactory response for non-conformance, satisfactory safety records, **reviewed after 2 years.**

**Qualified:** Procedures in place for non-conformance rectification, satisfactory office audit report, accredited key personnel, Public Liability insurance, **accreditation reviewed after 1 year.** (Opportunity to demonstrate performance and ongoing business).

**Construction work and services covered by this registration scheme:**

- (a) The following section provides a brief description of different categories of works or services, its scope and any prerequisite required for entry into different categories covered by this registration scheme.
- (b) All non-commissioned sewers and associated structures must be isolated from the South East Water live sewers, until the assets have been accepted by the South East Water.
- (c) Requests for isolations from live sewers, and authorisation by Accredited Contractors for these isolations to be removed must be in writing (on forms approved by the South East Water).
- (d) Please note that non-commissioned sewers and associated structures may still be considered as confined spaces. Competent Personnel must undertake a site/task specific job safety analysis or the use of a Confined Space Entry permit prior to any entry.

**Sewer and water supply construction categories:**

Sewer		Water	
<b>SC1</b>	<b>Reticulation:</b> Construction of gravity sewerage mains ≤ DN 280 and ≤ 3.5m deep including all pipe, fittings and structures.	<b>WC1</b>	<b>Reticulation water mains:</b> Construction of reticulation drinking and non-drinking water pipelines ≤ DN 280 including all pipes and fittings.
<b>SC1(a)</b>	<b>Reticulation:</b> Construction of gravity sewerage mains ≤ DN 280 and > 3.5m and ≤ 5m deep including all pipe, fittings and structures.	<b>WC2</b>	<b>Distribution water mains:</b> Construction of distribution drinking and non-drinking water pipelines >DN 280 including all pipe, fittings and structures.
<b>SC2</b>	<b>Branch/main sewers:</b> Construction of gravity sewerage mains > DN 280 or > 5m deep including all pipe, fittings and structures.	<b>WC3</b>	<b>Water supply pumping Station &amp; pressure control system:</b> Construction of drinking and non-drinking water supply pumping stations and/or pressure control systems including all civil, mechanical and electrical components and structures.
<b>SC3</b>	<b>Reticulation pressure pipelines in sewerage systems:</b> Construction of pressure sewerage reticulation networks < DN 300 (not rising main) including all of the pressure network components and property branches up to and including the boundary kits.	<b>WC6</b>	<b>Construction of steel mains</b> including the supply, installation, testing and commissioning
<b>SC4</b>	<b>Sewer pump station (prefabricated) &amp; sewer rising main:</b> Construction of prefabricated sewage pumping stations including all civil, mechanical and electrical components and storage structures.	<b>WC8</b>	<b>Storage structure:</b> Construction of structure designed to store drinking water and non-drinking water in excess of 20kL. Includes all civil, mechanical and electrical components and structures.
<b>SC5</b>	<b>Sewer pump station (cast-in-situ) &amp; sewer rising main:</b> Construction of concrete cast-in-situ sewage pumping stations including all civil, mechanical and electrical components and storage structures.		
<b>SC7</b>	<b>Any works undertaken on live sewer assets</b> Connection of sewer pipelines to an existing live sewerage system. Modification to an existing live sewerage system such as realigning a pipeline. This includes the lifting of maintenance hole covers.		

Risk	
<b>R1</b>	<p><b>Ground conditions:</b> This overlay is required in addition to another category when the works are to be undertaken in ground which may:</p> <ul style="list-style-type: none"> <li>• Be contaminated to the extent that it may be a hazard to workers or customers connected to the service, Have an AHBP (Average Horizontal Bearing Pressure) &lt; 50 kPa (eg: Coode Island silt)</li> <li>• Have a water table above or close to the asset being constructed</li> <li>• Be subject to acid sulphate conditions</li> <li>• Be subject to slippage.</li> </ul>
<b>R2</b>	<p><b>High density:</b> This overlay is required in addition to another category when the works are to be undertaken in an area where there are multiple buildings four or more stories high or continuous high density retail premises.</p>
<b>R3</b>	<p><b>Major crossing:</b> This overlay is required in addition to another category when the works to be undertaken involve crossing a:</p> <ul style="list-style-type: none"> <li>• Significant waterway which contains water on a permanent or near permanent basis (ie: the waterway is visible from satellite images or a map)</li> <li>• Highway or freeway which contains 4 or more lanes</li> <li>• Railway easement managed by Victrack.</li> </ul>
